

Case Study #5

More reductions

We delivered a Half Hourly electricity tender, which resulted in a saving of £31,000, compared to the previous 12 months.

Npower, the existing supplier produced a better quote but required a £17,000 security bond to support the contract. The next cheapest quote was Gazprom, with no security bond so the supply was switched.

We also implemented a meter purchase saving £3,500 over a 5 year term compared to the previous costs.

This case study shows how critical intervention by CCS helped a business to significantly reduce its energy expenditure.
